# letter from the president

**This year has been exciting for TMI. We were able to transform our strictly consulting company to provide our clients with dependable and timely list processing services. We recently were approved by the United States Postal Service to provide Change of Address services (via *FASTforward*). We have also led the industry in acquiring the newest additions to state telephone suppression lists.**

**We have also challenged to industry to restructure the pricing for services. While cost per thousand records processed was the standard, this encouraged bypassing processes that seemed insignificant or unnecessary, but were actually important for a quality job. Updates to marketing database were limited in an effort to lower costs, but this reduced the effectiveness and quality of the data. TMI's strategy has always been provide a platform that allow for industry best practices and a single comprehensive price that allows the client to make decisions on business needs not price per thousand. Our clients have truly embraced this strategy and have given nothing but positive comments. We will continue to forge ahead with this strategy.**

**The future looks great. We will be releasing a workstation version of Fast-Count DBMS. The new product will be a cost effective solution for large scale analysis with minimal Information Technology resources. Look for this by product in 3<sup>rd</sup> quarter.**

**Sincerely,**

**Timothy J. Martis**
